REELTEX® is a unique and easily handled single jacket hose designed for use on hose reels but without the weight of traditional hard rubber hose. It is made of 100% polyester construction, with helical reinforcement and red ENCAP™ treatment. Initially designed for wild land use, REELTEX® may be used in other applications but has limitations that should be taken into consideration. When using REELTEX® with foam educator systems, normal hose lay limits may change. Note reel diameter minimum requirements in the chart below. REELTEX® Patent No. 2168497.

**Weights & Coil diameter may vary with finished product

*** Recoupling 1 1/2" REELTEX® can be done with a standard 1 1/2" expander however, you must use expansion rings with the dimensions of 1 1/2" wide x 3/8" long.

**NIEDNER**

Since 1895, Niedner has been committed to procuring all raw materials from North American suppliers. This allows us to maintain the highest level of quality control and workmanship in our finished products. It also ensures the future employment of both American and Canadian workers in this industry and its related supply chain. Niedner has over a century of expertise in manufacturing high-quality hose products, a state of the art facility, and an ISO 9000-compliant quality system, we are proud to be the hose supplier of choice for those who demand the utmost in quality and performance from their hose products.
