

NIEDNER

INFINITOR™

INFINITOR™ is our longest single jacket hose. Available in large diameter sizes up to 12 inches and lengths up to 1,000 feet (305 meters), it is designed for use with high volume systems and comes standard with easy connect, leak free Storz couplings. This product is shipped in boxes however; it can also be shipped on heavy-duty, non-motorized steel reels, which can be driven with a PTO (hydraulic drive) from its center shaft for deployment and recovery operations. The reel fits on virtually any type of vehicle or trailer for transport and can be moved by forklifts, cranes or winches. Reels can also be custom designed to meet your operational needs.

Diameter		Spec #	WEIGHTS **				Operating		THICKNESS		Lengths		Pressure
