

INDUSTRIAL
 A SUPERIOR HOSE THAT SUPPORTS YOU IN SAVING LIVES

Williams operates in some extreme conditions, and after having problems of blowing off 5" couplings, we switched hose brands to Niedner. Now, in over six years of using Niedner hose of all sizes, ranging from 1.5" to the 7" Double 5 Hose that Niedner makes to our specifications, we have not had a single coupling of any size blow off Niedner hose. This hose is much lighter and easier to handle, and also has higher test pressures than the nitrile rubber LDH we used in the past. Niedner Hose is a product we can and do depend on!
